(54) Title: DEVICE FOR FIXING A MANIFOLD FOR FLUID DISTRIBUTION

(54) Titre: DISPOSITIF DE FIXATION POUR UN COLLECTEUR DESTINE A LA DISTRIBUTION DE FLUIDE

(57) Abstract: The invention concerns a device comprising a support plate (6) designed to receive the manifold and whereon is mounted pivoting at least one shaft (14) wherein is screwed a screw (12) perpendicular thereto. A manifold for distributing fluid adapted to said fixing device comprises a tubular body (18) having a longitudinal axis (20) with which is associated at least a radial outlet (22). On two opposite faces, are provided two fixing brackets (36) each comprising a base (38) linked to the body (18) of the manifold and two branches (40) extending in a substantially transverse direction.

(57) Abrégé: Ce dispositif comporte une plaque support (6) destinée à recevoir le collecteur et sur laquelle est montée pivotant au moins un axe (14) dans lequel est vissée une vis (12) qui en est perpendiculaire. Un collecteur pour la distribution de fluide adapté à ce dispositif de fixation comporte un corps tubulaire (18) présentant un axe longitudinal (20) auquel est associée au moins une sortie radiale (22). Sur deux faces opposées, deux étriers de fixation (36) comportant chacun une base (38) rattachée au corps (18) du collecteur et deux branches (40) s'étendant dans une direction sensiblement transversale sont prévus.
